

## Plumbing / Grinding / Welding Protection Pads

1800°F / 982°C InSilMax™ Fabric

These mini pads are fabricated from Extreme High Temperature InSilMax™ Cloth, with serged / overlocked edges to prevent fraying, and with one edge folded and sewn and also grommeted at two corners.

Can be hung or tacked behind welding, grinding or soldering work to protect walls, wiring, hoses, etc. from being damaged during maintenance or fabrication work.

Also used as annealing pads in tempering ovens for metal fabrications.

These pads pay for themselves very quickly by preventing costly damage that could have been easily avoided.
