## Petroleum Hose Group Banding Sleeves

For use with tank drop hoses and vapor recovery hoses.

A 12" length is used per hose end to prevent band clamps from slipping into the corrugation and damaging the hose.

Fabrications to be performed only by experienced personnel. Static wire must be properly embedded, grounded and tested prior to use to assure proper grounding of the hose and assembly.

Standard length is 3 feet.

### Tech Data:

Tube and Cover: Non-food grade PVC  
Temperature: -40°F to 150°F
