

Neoprene High Temperature Ducting – Single Layer & 2 Layer

302°F / 150°C

5/8" / 16mm to 10" / 254mm ID – 13 foot / 4 m lengths

1 Layer Neoprene

2 Layer Neoprene

- Designed for air handling – cold, ambient or hot.
- Constructed from neoprene coated glass reinforced fabric.
- 1 Layer or Two layer.
- With or without cuffs, either end.
- Standard 4m/13 foot length or custom length. Custom length tolerance is +5mm / +.19"
- Galvanized spring steel support coil.
- Glass fiber outer support spiral.
- Plain ends or with cuffs.
- High temperature use.
- Typical use to direct airflow in machinery.
- Neoprene color black

Duct with cuffs installed

Highly Flexible

For custom lengths, pricing is per metre to the closest longer cm
Each cuff is \$5.00 for sizes below 4 inches and \$7.00 for sizes above 4 inches

For the "X" value: use "S" for Standard Length
or use a number to represent total length, including cuffs, in metres to two decimal places
Example: 1.6 for 1.6 metres, or 2.23 for 2.23 metres. (tolerance + / - 1cm)

For the "Y" value: use "0" for no cuffs; "1" for 1 cuff; "2" for 2 cuffs

Minimum order value is \$50.00
