

## Braided Carbon Fiber Sleeve

1000°F / 537°C: Continuous Rating – Higher Temperature for Shorter Periods

High Temperature & Heat Resistant

Available in 0.013", 0.020" and 0.030" wall thickness.

Used to fabricate tubular structures that are lightweight and strong.

The cut ends will fray – standard anti-fray techniques can be used such as metal wire or clamps.
