

HVAC refrigerant line insulation protection sleeve - HVACGuard™
375°F / 190°C Maximum Continuous
Building Code Complaint: C 403.2.10.1 & R 403.4.1

- HVACGuard™ is a coated polyester woven sleeve with a hook and loop closure system allowing for easy installation and removal.
- Used to wrap refrigerant lines which have an insulation layer.
- 1 ½" wide hook and loop allows for adjustable snug fit and use on a variety of pipe/insulation sizes and tight bends.
- Abrasion, wear, weather, UV, puncture and cut resistant protection.
- Easily cut to length or cut with heat knife.
- Useable -60°F to +375°F.
