

Sleeve Forming Heat Reflective Tape Aluminized PET Film Coated Fiberglass Tape; with adhesive 1000°F / 537°C: FlameShield™ High Temperature & Radiant Heat Reflective

- Protection from intense radiant heat. Reflects more than 95% of the radiant heat that contacts its surface.
- Base fabric rated for continuous operation at 1000°F / 537°C.
- This tape has a high temperature adhesive on each edge flap, allowing it to be formed as a sleeve around wires, cables and hoses.
- If one of the edge flaps is removed, then the tape can be formed into a freely resting sleeve which is not adhered to whatever it is covering.
- Provides protection for cables and hoses when radiant heat from infrared sources such as super-hot metal slabs, proximity to liquid metal, open flame/plasma or engine exhaust manifolds is a concern.
- Thickness of .025".

This high temperature and radiant heat reflective tape is constructed from a high-temperature fine woven fiberglass fabric substrate, which is then coated with highly-reflective aluminized PET film. The base fabric is designed for long term continuous operation at 1000°F / 537°C, this sleeve will withstand short duration exposure up to 1200°F / 650°C. This tape has an adhesive strip on each side that includes a release film. Added protection can be achieved by layering with other sleeve or tape materials underneath the reflective layer.
